Smithfield NSW 2164

P 02 9616 7444

M 0434 427 400

E terry@specialbuild.com.au

W specialbuild.com.au

Circa 1987, Specialbuild Engineered Innovation is where decades of engineering dedication meets excellence in design to bring you remarkable, stunning results.

With an A list of Clients such as Jamie Oliver, Kate Spade and James Squire, Specialbuild can make your new project a stunning architectural masterpiece.

From Landscape planters or an amazing lap pool (as shown), sculptural water features to our inspiring Haj char grills and firepits, Specialbuild will work alongside your architect, landscape designer or interior

designer for detailed engineered and fully designed finishing and fitouts.

The company's facility is an award winning World Class 3D computer operated facility with a full range of Corten material, laser cut screens, pergolas and architectural structures.

If that's not enough to convince you, Specialbuild's services have been recognised by winning multiple industry awards for projects including the FORTS award 2015 for best construction and in 2014, for best architectural art piece. In 2017 the company worked on the Dangrove works for multi award winning prestigious architect, Alex Tzannes.

Check out Specialbuild's newly launched website in the want more info panel above for inspiration.
